

# Using Follett Shelf (FHSD ebooks) on a mobile device

1. On Apple and Android products - in the app store, search for Destiny Quest and Follett Enlight apps.

(you don't need Follett Enlight unless you want to download an ebook to your device. You can read books directly from Destiny Quest. Destiny Quest is the library catalog for both print and ebooks. The ebooks can be read from Destiny Quest. Follett Enlight is the reader for ebooks and allows you to download a book if you will not have access to the WiFi/Internet.

2. Once the app is install, you will need to enter the following URL on the Destiny Quest:

<http://fhdschools.follettdestiny.com>

The app will ask you to select a school: select Becky-David

Then you can either log in using (students -- username: first initial, last name, and last 3 digits of ID number and password: is the full ID number)

OR you can Explore as Guest simply select Try Destiny Quest. You will only be asked the first time using the app to select a school, after that the app will bring up Becky-David. Also the app will not ask to log in before opening.

However, you can log in once the app is open down at the bottom of the screen.

3. Once Follett Enlight is installed on your device you will need to enter the following URL: wbb05429 (student login info -- username: first initial, last name, and last 3 digits of ID number and password: is the full ID number)

To get to Follett Shelf at any time in an app or online go to the upper left hand

corner and click on the three books.

When you are in the Enlight App when you try to open a book it will ask you to download the book before you open it. In Destiny Quest you can open the book without downloading it first.
